

## **A Guide to Creating PDF Smart Forms for Customers to Use**

One of the Amazing Features of Desktop Publishing is Making Smart PDF Forms, that Customers can Complete and Email back to you for Orders, Information, Enquires at the Click of a Button

You can Create a PDF Smart Form, so Customers can Complete the Form and Email or Print and Send back to You, Quickly and Cheaply. Very Handy! With Adobe PDF Reader Installed and Using Firefox Web Browser (in Windows or Linux) you can Complete and Email the Form Online from My Browser in a Second or Two.

When you Receive the Email from a Customer, You can Simply Re-import the Data to the Original Form and all the Information is Available to You. Paperless Office Here We Come!

It works well in Adobe Acrobat Reader or Foxit PDF Reader in Windows and Linux. I am running Kubuntu Linux 10.04.
